

# HELLA LED Retrofit

## LEDification for all!

Brighter, stronger, cooler: with the new LED Retrofit Bulbs for Fog lights. The short path from Halogen to LED: With the new LED retrofits, car lighting can be upgraded to the latest technology. The new LED retrofits offer exceptional brightness and thanks to optimized light distribution there is more light on the road where it is needed. A longer service compared to halogen bulbs makes the LED retrofits attractive for all car drivers. The stylish look with a cool white beam gives the customers a day light effect in the night and more comfort and joy while driving. Our new portfolio offers a comprehensive range of applications for fog lights.

Quality you can feel - and see!

**Halogen goes LED**

## LED Retrofit – a strong piece of HELLA technology

The new LED Retrofits produce a white light similar to daylight. The optimum visibility makes driving much more comfortable and relaxed, especially at night. Durability and high functionality included, of course.

## Simply retrofit - your workshop knows how to do it

With **HELLA LED Retrofit** you can have your path illuminated with the powerful LED lamps. However, you should leave the conversion to workshop professionals instead of doing it yourself.

**Because they know their way around questions such as**

- Which variant is the right one for my vehicle?
- How are the retrofit LED lamps installed?
- What technical settings need to be made?
- What should I do if the lamps do not produce any light?
- For which lamp do I also need a canbus for installation?

Therefore, rely on the expertise of your workshop for the conversion!

## Variety for almost every fog light application - the HELLA LED Retrofit Bulbs:

**~H3 LED**  
12 / 24 V  
#226971511  
Set of 2

**~H7 LED**
