Forklifts are used everywhere there is a need to transport and load heavy loads safely and reliably. A demanding task, which requires optimal lighting. The HELLA product range for forklifts provides the products required for this. In addition to work lights and reversing lights as well as front and rear combination lamps, our extensive portfolio also encompasses beacons, side lights and daytime running lights. Interior lights are included in our product line, too. We rely on advanced LED technology, which offers numerous advantages such as high energy efficiency, no maintenance and a long product service life.

In addition to reliable lighting, components for electrics and electronics are highly important for proper forklift operation. In this area, too, HELLA provides a comprehensive selection of products. Whether lighting, electrics or electronics: For all HELLA products you can always rely on the high HELLA quality, which we ensure with strict internal quality criteria. For more information visit:
